Sailesh Dash

Senior QA Consultant | QA Automation Engineer | Manual & Automation Testing

Hyderabad, India | [redacted] Email: t.saileshdash@gmail.com | Open to Remote Roles

PROFESSIONAL SUMMARY

QA professional with 6.5+ years of experience across Manual and Automation Testing for mobile applications, web applications, and APIs. Experienced in designing and executing black-box testing strategies including functional, regression, smoke, integration, exploratory, end-to-end, and API testing. Hands-on with JavaScript, Playwright, Jenkins, Jira, TestRail, ReleaseMate, Zephyr Scale, Claude, Cursor, Bruno, Postman, Kafka and related QA engineering tools. Strong domain exposure across ERP, Banking, Investment, Real Estate, Financial Services, E-Learning, and E-Commerce applications. Currently working with Deloitte and seeking remote QA/SDET opportunities.

CORE COMPETENCIES

Testing: Manual Testing, Automation Testing, Mobile Testing, Web Testing, API Testing, Black-Box Testing, Functional Testing, Regression Testing, Smoke Testing, Integration Testing, Exploratory Testing, End-to-End Testing, Test Case Design, Defect Management

Automation: Playwright, JavaScript

API & Integration: Postman, Bruno, Kafka

CI/CD & DevOps: Jenkins

Test Management: Jira, TestRail, Zephyr Scale, ReleaseMate

AI-Assisted QA: Claude, Cursor

Domains: ERP, Banking, Investment, Real Estate, Financial Services, E-Learning, E-Commerce

PROFESSIONAL EXPERIENCE

Deloitte | QA / Quality Engineering Professional | Jun 2026 – Present

- Perform Manual and Automation Testing for application quality across web, mobile and API layers.
- Design and execute black-box test scenarios covering functional, regression, smoke, integration and end-to-end testing.
- Use Playwright and JavaScript for UI automation and leverage API testing tools for service validation.
- Collaborate with Agile teams using Jira and test management/reporting platforms to track defects, execution and release readiness.
- Apply AI-assisted tools such as Claude and Cursor to improve test analysis, test design and engineering productivity.

Datamatics Global Services Limited | Senior QA Consultant | Jul 2019 – Oct 2025

- Delivered Manual and Automation Testing for web, mobile and API-based applications across multiple business domains.
- Created and executed black-box test scenarios with strong coverage of functional, regression, smoke, exploratory and end-to-end testing.
- Built and maintained UI automation using JavaScript and Playwright for critical business workflows.
- Performed API validation using Postman and supported integration testing involving asynchronous/event-driven systems.
- Worked with Jenkins for automation execution/CI workflows and Jira plus test management tools for defect and test tracking.
- Collaborated with developers, product owners and business stakeholders in Agile delivery environments.

EDUCATION

- B.Tech – Bachelor of Technology
- Diploma – Engineering

CAREER OBJECTIVE

Seeking remote opportunities in QA Automation, Senior QA, Quality Engineering, SDET, or Test Automation roles where strong manual testing, black-box testing, Playwright automation, API testing and modern QA tooling can contribute to reliable software delivery.
